External Waste Bins

Storage of household waste

The space allocated for waste storage should be able to accommodate containers with at least the minimum volume recommended by British Standard 5906 (British Standards, 2005) based on a maximum collection frequency of once per week.

This is:

- 100 litres volume for a single bedroom dwelling
- with a further 70 litres volume for each additional bedroom.

This specification may change due to Local Authority collection schemes etc. Please see the technical guide for further information

"Code for Sustainable Homes Technical Guide November 2010"

Bespoke Cycle Solutions

[Call for Pricing](#)

We Can provide Bespoke cycle storage solutions to meet your Code for Sustainable Homes requirements.
