Compost Bins

Home Composting Facilities

Home composting facilities must consist of an external composting container, specifically designed for composting, sited according to the manufacturer's instructions and accessed by route in accordance with the requirement of Checklist IDP. Such containers must not be sited in close proximity to windows, doors or ventilation intakes for habitable areas within the dwelling or surrounding dwellings.

"Code for Sustainable Homes Technical Guide November 2010"

Composting Bin

£24.05
