**Airtight Grommets**

**Roflex Grommets**

**£9.50**

If pipes or cables penetrate the airtightness layer, they too must be securely sealed with airtightness grommets made from EPDM, this flexible material allows a tight flexible fit. Roflex grommets should be sealed to Intello Plus with Tescon No. 1. [\[Product Details...\]](#)

**Kaflex Grommet**

**£13.75**

If pipes or cables penetrate the airtightness layer, they too must be securely sealed. Kaflex does this by being flexible whilst maintaining an airtight fit around any cables passing through it. [\[Product Details...\]](#)

**Instabox**

**£15.75**

Used for the airtight installation of service boxes, without a service void on the interior of external walls. It is designed for making airtight connections on vapour check and airtightness layers indoors. [\[Product Details...\]](#)
