## The Code Shed (Bike and Tool Storage) \_

Â

### Adequately Sized Cycle Storage

The minimum storage area required to store cycles on the floor, defined by the New Metric Handbook, which includes space to allow the cycles to be moved independently.

- 1 cycle: 2 m long Ã— 0.75 m wide
- 2 cycles: 2 m long Ã— 1.5 m wide
- 4 cycles: 2 m long Ã— 2.5 m wide

Where cycle storage is provided in a shed, a minimum of 1 m<sup>2</sup> is required for garden tools (in addition to the above dimensions). The shed must be set on a concrete foundation and secure fixing needs to be provided.

*"Code for Sustainable Homes Technical Guide November 2010"*
